

Mahima C. Vineeth

Data Engineer | Azure Data Factory | SQL | Python | ETL | Healthcare Data Integration

Cork, Ireland | Phone: 0876928100 | Email: mahimavineeth3@gmail.com |

LinkedIn: [linkedin.com/in/mahima-vineeth](https://www.linkedin.com/in/mahima-vineeth) | Eligible to work in Ireland (No sponsorship required)

Professional Summary

Data Engineer with nearly 3 years of hands-on experience designing, developing and supporting Azure-based ETL pipelines for healthcare data integration, backed by over 6 years of software engineering experience. Skilled in Azure Data Factory, Azure SQL Database, SQL Server and Python, with expertise in data integration, production support, SQL performance optimisation and data quality. Experienced working in Agile teams using Git and Azure DevOps to deliver secure, scalable data solutions for regulated healthcare environments.

Technical Skills

Data Engineering: Azure Data Factory (ADF), ETL Pipeline Development, Data Integration, Data Validation, Data Quality, Data Governance, Pipeline Monitoring, Production Support

Databases: Azure SQL Database, SQL Server, SSMS, T-SQL, PL/SQL, MySQL, SQLite

Programming: Python, SQL, Java

Cloud: Microsoft Azure, Azure Data Factory, Azure SQL Database, Azure Virtual Machines, Azure Storage, Azure Resource Management

Analytics & Reporting: Power BI, SQL Reporting, Data Analysis

Development Tools: Git, GitHub, Azure DevOps, GitHub Copilot, VSCode, Jira, ServiceNow

Engineering Practices: Agile(Scrum), CI/CD, Code Reviews, Testing, Troubleshooting, Root Cause Analysis, Production Support

Professional Experience

Healthcare Logic – Ireland

Data Engineer | Sept 2023 – June 2026

- Designed, developed and maintained Azure Data Factory ETL pipelines integrating healthcare data from multiple hospital systems into enterprise platforms.
- Developed complex SQL queries, stored procedures and data transformation logic using Azure SQL Database and SQL Server to support healthcare reporting, analytics and operational workflows.
- Optimised SQL stored procedures and queries, reducing execution times from over 30 minutes to as little as 2–6 seconds for critical healthcare processing workloads.
- Provided production support for business-critical healthcare integrations, investigating data issues, performing troubleshooting and ensuring reliable pipeline operation.
- Performed data validation and implemented data quality checks to improve accuracy, consistency and regulatory compliance.
- Monitored scheduled Azure Data Factory pipelines, investigated failures and resolved data integration issues to maintain reliable production services.
- Collaborated on data mapping and integration design to ensure consistent and reliable data exchange between healthcare systems.

- Collaborated with software engineers, QA analysts and product teams in Agile environments, participating in code reviews, testing and continuous improvement initiatives.
- Managed source code using Git, participated in pull requests and code reviews, and supported deployment activities through Azure DevOps.
- Leveraged GitHub Copilot and AI-assisted development tools to improve development productivity, debugging and documentation.

Technologies: Azure Data Factory • Azure SQL Database • SQL Server • Python • Git • Azure DevOps • Power BI • Jira • GitHub Copilot

PFH Technology Group – Cork, Ireland

IT Support Specialist | Jan 2023 – Apr 2023

- Delivered onsite technical support and laptop deployment for enterprise clients.
- Resolved hardware and software issues while maintaining excellent customer service.
- Documented incidents and collaborated with client IT teams.

Tech Mahindra Ltd – Bengaluru, India

Software Engineer | Apr 2019 – Oct 2022

- Developed SQL Server stored procedures, functions and complex queries supporting enterprise reporting and business applications.
- Built Python scripts for data extraction, transformation and reporting automation.
- Supported SAP PI integration interfaces, IDOCs and enterprise messaging workflows.
- Worked with Power BI gateway configuration and Azure service requests.
- Investigated production issues using ServiceNow and collaborated with cross-functional teams to deliver timely resolutions.
- Participated in Agile sprint planning, testing, deployment and production support.

Technologies: SQL Server • Python • SAP PI • Power BI • Azure • ServiceNow

Leap InfoTech Solutions – Kozhikode, India

Web Developer | Aug 2018 – Mar 2019

- Developed web applications using PHP, JavaScript and MySQL.
- Designed and optimised relational database structures.
- Improved application performance through database optimisation.

Education

Master of Computer Applications (MCA) – University of Calicut, 2015–2018

BSc. Computer Science – College of Applied Sciences – IHRD, 2012–2015

Certifications

- Microsoft Azure Essentials Professional Certificate – Microsoft & LinkedIn Learning | 2026
- VMware Certified Professional (VCP)
- VMware Certified Technical Associate – Data Center Virtualization (VCTA-DCV)
- Database Foundations – LinkedIn Learning
- Java & PHP Training – IIT Bombay (Spoken Tutorial)
